

As one of Europe's leading airborne surveying companies, we are advertising an open position at our Berlin-Schönefeld (Germany) office as an

International Project Manager 3D Mapping

In this role, you take responsibility for managing and coordinating complex, international data collection, data analysis and consulting projects. You act as single point of contact for our project clients. You work with our flight operations and mapping specialists across Europe and selected industry partners to successfully achieve the project goals.

Your benefits:

- Manage challenging international projects in one of Europe's leading 3D Mapping companies with a modern fleet of aircraft and sensors and a skilled, motivated team of experts.
- Work with an experienced, hands-on management team with short decision processes and a clear forward strategy.
- Enjoy modern, flexible employment conditions.

Your profile:

- Academic degree in a related field: Geodesy, surveying, GIS, cartography or similar.
- More than 10 years' experience in the surveying and mapping industry. An existing network in the European mapping market is a big plus.
- Good working knowledge of 3D mapping technologies and trends: Sensors, software, processes and products.
- Fluent in the English language. German language skills are a plus.
- Highly self-motivated and independent, solution-oriented and focused on the project and company goals. Good communication and people skills.

We look forward to getting to know you! Please send your application via email to:
